

NEWS RELEASE - 6 MARCH 2017

## CoreScan Commissions Hyperspectral Scanning Laboratory at Regulus Resources' Antakori Project, Cajamarca, Peru

CoreScan S.A.C. of Peru, a member of the CoreScan Group of Companies ("CoreScan"), is pleased to announce the signing of an agreement with Southern Legacy Peru S.A.C., a wholly owned subsidiary of Regulus Resources Ltd (REG TSX.V) ("Regulus"), for the provision of an onsite laboratory at Cajamarca, northern Peru, for the scanning and analysis of drill core and other geological samples from Regulus's Antakori project and surrounding interests.

CoreScan's laboratory will acquire high resolution hyperspectral imagery, photography and laser profiler measurements of the core surface, with the data processed and interpreted by CoreScan's spectral geology team, delivering detailed alteration information, mineralogical assemblage maps, compositional variations, mineralogical textures and various geotechnical parameters. Data will be made available via CoreScan's online portal, Coreshed™ ([www.coreshed.com](http://www.coreshed.com)). The utility of this world class, innovative dataset will not only be key to Regulus's ongoing exploration activities in the region, but will positively impact future project development, mine engineering, environmental planning and mineral processing.

Under the scope of the initial contract, CoreScan will scan and process ~15,000m of historical drill core and ~15,000m of new drill core from Regulus's Antakori project during 2017.

The award of this project to CoreScan is not only a strong endorsement of CoreScan's leading technology, but of the company's ability to deliver on major projects across Latin America. CoreScan operates laboratories in Chile, Peru and Mexico and are in the process of establishing facilities in Argentina.

For further information please contact Neil Goodey, Managing Director, on +61 4 1798 5369 ([neil.goodey@corecan.com.au](mailto:neil.goodey@corecan.com.au)) or Dr Brigette Martini, Chief Geologist, on +1 541 261 4623 ([brigette.martini@corecan.com.au](mailto:brigette.martini@corecan.com.au)).

Delivery of CoreScan's laboratory to Cajamarca

CoreScan's laboratory commissioned at Regulus' core facility

**About Corescan ([www.corescan.com.au](http://www.corescan.com.au))**

Corescan is global services company specialising in the scanning, analysis and interpretation of drill core, rock chips and other geological samples for the mining, oil and gas, geothermal and geotechnical industries. As a service driven company, Corescan seeks to be the partner of choice for companies that demand greater objectivity, quality, efficiency and return from their investment in drilling.

**About Regulus ([www.regulusresources.com](http://www.regulusresources.com))**

Regulus Resources Inc. is an international mineral exploration company run by an experienced technical and management team, with a portfolio of precious and base metal exploration properties located in North and South America.
